FEEDING TABLE

Approximate Age of Infant	Quantity to make 1 feed		Number of feeds per day
	Level Scoop of Aptamil Stage 1	Water (ml)	
Upto 4 weeks	3	90	6
4-6 weeks	4	120	5
7-8 weeks	5	150	5
2-4 months	6	180	5
4-6 months	7	210	4

Approximate Quantity per level scoop 4.5g

Storage Instructions: On opening this pack, the contents should immediately be transferred to an empty, clean, dry and airtight container. Replace the lid tightly after each use and store in a cool dry place. After opening use the contents within three weeks or the expiry date whichever is earlier. The scoop and water measuring cup provided with the pack should be thoroughly washed and dried before use.

Caution: Unboiled water, unsterilized bowls/spoons or incorrect dilution may endanger infant's health. Prepare only one feed at a time. Use prepared feed immediately (within half an hour) otherwise microbial deterioration may set in. Discard unused feed. Always hold baby while feeding. Leaving the baby unattended may cause choking.

Warning/Caution: Careful and hygienic preparation of Infant Milk Substitute is most essential for health. Do not use fewer scoops than directed since diluted feeding will not provide adequate nutrients needed by your infant. Do not use more scoops than directed since concentrated feed will not provide the water needed by your infant. Infant Milk Substitute should be used only on the advice of a health worker as to the need for its use and the proper method of its use. Infant Milk Substitute or Infant Food is not the sole source of nourishment of an infant. It is important to follow the mentioned feeding and storage instructions while using this Infant Formula for your baby's wellbeing.
